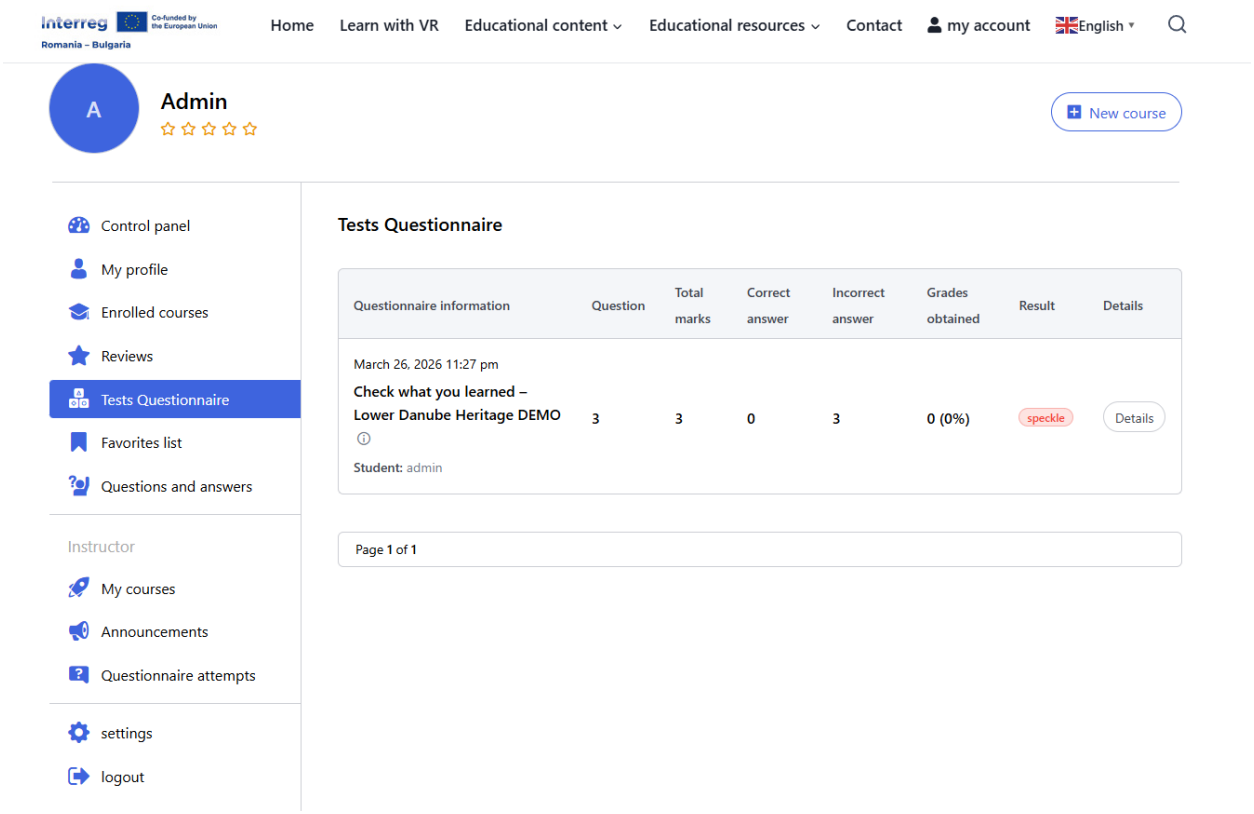
STUDENT PROGRESS TUTORIAL – PLATFORM OVERVIEW



Welcome!
In this tutorial, I will show you what information you can see as a teacher in the platform, both in your dashboard and in the admin area, to track student progress.

After logging in, you will land in your account dashboard.
This is the main area where you manage your activity.

On the left side, you will see a menu with sections like:
Dashboard, My Profile, and My Courses.
Let's start with the Dashboard.

DASHBOARD OVERVIEW
Here you will find a few important indicators:
"Enrolled Courses"
This shows the total number of enrollments in your courses.
It tells you how many times your courses have been accessed by students.

"Active Courses"
These are courses that are currently in progress.
Students are still enrolled and have not completed them yet.

"Completed Courses"
This shows how many courses have been finished by students.
It gives you a general idea of completion.

“Total Students”
This represents the total number of students enrolled in all your courses.

Important note:
These values give you a general overview,
not detailed progress for each individual student.

MY COURSES
To see more details, go to:
“My Courses”
Here you will see all the courses you created.
Select a course to view more details.

Inside the course, you can see the list of enrolled students.
You can identify who is participating,
but you will not see the exact progress percentage for each student.

QUIZ ATTEMPTS
To evaluate student activity, go to:
“Quiz Attempts”
Here you can see:
– student scores
– answers
– quiz status
This is the main way to track real progress.

ADMIN AREA (WORDPRESS)
Now let’s look at the admin side.
From the top bar, go to the WordPress Dashboard.

In “Users”, you can see all registered students.

In:
Tutor LMS → Courses
You can see all courses and how many students are enrolled in each.

In some cases, you will also see:
“Quiz Attempts”
Here you can analyze student results in more detail.

CONCLUSION
As a teacher, you can see:
– number of courses and students
– who is enrolled in each course
– quiz results

For detailed tracking, such as:
– completion percentage
– lesson progress
additional features may be available depending on platform setup.

I hope this tutorial helps you better understand
how to track your students' activity.
Start simple and explore step by step.
